MAPLUS *Ski Wax*

EXTRAORDINARY PERFORMANCE

Cari amici,

è con grande soddisfazione che in occasione della stagione Olimpica 2009-2010 e del 10° anniversario della nascita del marchio MAPLUS Vi presentiamo il nuovo marchio BRIKO-MAPLUS *Ski Wax*.

Il nuovo marchio nasce da un accordo di grande respiro tra due aziende protagoniste del mondo delle scioline e della preparazione degli sci. La Briko e la Maplus da questa stagione avviano una collaborazione tecnica e commerciale innovativa, orientata allo sviluppo ed alla distribuzione di prodotti di qualità per tutti gli sportivi della neve attenti agli aspetti tecnici di sci e snowboard.

La Maplus è da sempre sinonimo di ricerca scientifica, innovazione e performance nel campo degli sport invernali, pertanto con riferimento all'esperienza venticinquennale della Briko sui campi di gara è stata messa a punto una nuova gamma di scioline ed accessori che rappresenta il meglio della tecnologia italiana e che vuole porsi come il punto di riferimento nel campo agonistico e ricreativo. Ecco perché "extraordinary performance". Tutti i dati in nostro possesso provenienti sia dai laboratori di ricerca chimico-fisica che dai campi di sci, tramite il Testing Team, i Servicemen in Coppa del Mondo e le collaborazioni con le Squadre Nazionali, ci confermano che stiamo percorrendo la strada giusta e che i nostri prodotti si posizionano al vertice delle prestazioni sia in termini di scorrevolezza che di durata. In questo nuovo catalogo che Vi presentiamo, abbiamo condensato l'esperienza di Briko e di Maplus acquisita negli anni sulla neve per proporre dei prodotti utili, di facile utilizzo ed elevato rendimento.

La passione e l'impegno di tutto il team BRIKO-MAPLUS *Ski Wax* sono a vostra totale disposizione per garantirVi il massimo divertimento.

Guido Chiarle
BRIKO-MAPLUS *Ski Wax*
Guido Chiarle

Dear friends,

On the occasion of 2009-2010 Olympic season and the 10th anniversary of the Maplus brand we present to you all with great satisfaction the new brand BRIKO-MAPLUS *Ski Wax*.

The new brand was created by mutual agreement between two leading brands in the world of snow wax and snow waxing tools. This season Briko and Maplus embark on an innovative technical and marketing collaboration to develop and distribute high quality products for all snowsport enthusiasts focused on the technical aspects of ski and snowboard performance.

Maplus is synonymous with scientific research, innovation and performance in ski wax development and now, combined with Briko's 25 years of experience has formulated a new line of wax and accessories

representing the best Italian technology available for racing and recreational winter sports. Why do we consistently achieve "extraordinary performance"? All the data coming from the chemical and physical research laboratories, the snow slopes from our testing team, our World Cup servicemen and the World Cup teams proves above all we are on the right track with the best new products in terms of gliding performance and durability. This new catalogue places easy to use, high performance products at your fingertips drawing on the many years of combined experience that is Briko and Maplus.

The passion and engagement of the entire BRIKO-MAPLUS *Ski Wax* Team is at your service to optimize your enjoyment.

Cher Amis

C'est avec grande satisfaction qu'à l'occasion de la saison Olympique 2009-2010 et du 10ème anniversaire de la marque MAPLUS, nous vous présentons la nouvelle marque BRIKO-MAPLUS *Ski Wax*.

La nouvelle marque est née suite à une grande réflexion en accord entre deux sociétés protagonistes du monde du fart et de la préparation des skis. Durant cette saison, Briko et Maplus ont tout deux une collaboration technique et commerciale novatrice, orientée sur le développement et la distribution des produits de qualité pour tous les sportifs évoluant sur la neige à l'affût de technicité en ski comme en snowboard.

Maplus à toujours été synonyme de recherche scientifique, d'innovation et de performance sur le secteur des sports d'hiver. Forts de l'expérience bi-décennal de BRIKO sur le secteur de la compétition, nous avons mis au point une nouvelle gamme de fart et d'accessoires qui représente le meilleur de la technologie italienne et qui se place comme le point de référence tant pour les professionnels que pour les amateurs de sports hivernaux. On peut donc parler de "performance extraordinaire".

Tout ce que nous proposons provient de nos deux laboratoires physico-chimiques dans le secteur du ski, entre autre le service test de recherche, le service Coupe du Monde et la collaboration avec l'Equipe Nationale, qui confirme que nous suivons la bonne voie et que nos produits se positionnent au top de la performance tant en terme de facilité que de durée.

Dans le nouveau catalogue que nous vous présentons, nous avons concentré l'expérience de BRIKO et de MAPLUS acquise toutes ces années sur la neige pour vous proposer les produits les plus utiles, faciles d'utilisation et au rendement le plus élevé.

La passion est la motivation première de toute l'équipe BRIKO-MAPLUS *Ski Wax* qui reste à votre plus grande disposition pour vous garantir un maximum de divertissement.

Sehr geehrte Kunden!

*Voll Stolz können wir - heuer in der Olympia-Saison 2009-2010 und anlässlich des 10. Geburtstags von MAPLUS - einen weiteren Meilenstein in unserer Firmengeschichte bekanntgeben: die Entstehung unserer neuen Marke BRIKO-MAPLUS *Ski Wax*.*

Diese neue Marke entsteht auf Grundlage eines weitreichenden Übereinkommens zwischen zwei der weltweit führenden Hersteller von Skiachsen. Briko und Maplus sind ab dieser Saison eine innovative Kooperation auf technologischer wie auch kommerzieller Basis eingegangen, welche zum Ziel hat, in Zukunft Qualitätsprodukte für begeisterte Wintersportler gemeinsam zu entwickeln und zu vermarkten.

*Maplus ist seit seiner Gründung zum Synonym für wissenschaftliche Forschungsarbeit, Innovation und höchste Performance im Bereich von Wintersportartiklen geworden und erhält nun durch die Kooperation mit BRIKO - seit 25 Jahren einer der ganz grossen Namen im Rennsport - wertvolle Unterstützung. Ziel ist es, das Beste beider Marken zu vereinen und Skizubehör für den Top-Rennlauf wie auch den begeisterten Wintersportler auf höchstem internationalen Niveau zu produzieren: „extraordinary performance“ ist unsere Firmenphilosophie und unser oberstes Ziel. Sowohl die Ergebnisse unserer intensiven und permanenten Forschungsarbeit als auch das ständige Feedback von Testteams und Serviceleuten im Weltcup Alpin und Nordisch zeigen, dass wir uns am richtigen Weg befinden und unsere Wachsprödukt sowohl aufgrund ihrer herausragenden Gleiteigenschaften als auch ihrer hervorragenden Haltbarkeit „state of the art“ sind. In unserem neuen Katalog haben wir all die Erfahrungen, die Briko und Maplus seit vielen Jahren auf Schnee gesammelt haben, erstmals in einem neuen Sortiment verdichtet. Die Leidenschaft und die Anstrengungen des BRIKO-MAPLUS *Ski Wax* -Teams garantieren auch für die Zukunft Qualität und Innovation auf höchstem Niveau.*

Дорогие друзья,

*с большим удовлетворением в связи с начинающимся Олимпийским сезоном 2009-2010 г. и с 10-ой годовщиной рождения марки MAPLUS мы представляем вам новую марку BRIKO-MAPLUS Ski Wax *Ski Wax*.*

Новая марка рождается с большим вдохновением в согласии между двумя главными в мире фирмами по производству лыжных мазей и подготовки лыж. Briko и Maplus с этого сезона введут новшество в техническом и коммерческом сотрудничестве, направленное на развитие и продажу высококачественных товаров любителям зимних видов спорта, которые интересуются новизной в технике подготовки лыж и сноуборда.

Фирма Maplus всегда была синонимом научного исследования, новшества и представления в области зимних видов спорта, поэтому и сейчас с двадцатипятилетним опытом участия в соревнованиях фирмы Briko мы предлагаем новую гамму лыжных мазей и аксессуаров, которые представляют в лучшем виде итальянскую технологию и хотим выступить в качестве отправной точки в спортивных и рекреационных зимних видах спорта. Вот почему „extraordinary performance“. В нашем владении все данные, происходящие как из лабораторий физико-химических исследований, так и из лыжной области благодаря работе на чемпионатах мира тестирующих команд и сервисменов и в сотрудничестве с национальными командами, подтверждают, что мы движемся по правильному пути и что наши продукты находятся в верхней эффективности с точки зрения скольжения и длительности. В этом новом каталоге, который мы вам представляем, соединены многолетний опыт Briko и Maplus, накопленный на всех видах снега, чтобы предложить вам нужные продукты, простые в использовании и с высокой эффективностью.

*Пристрастие и обязательство всей команды BRIKO-MAPLUS *Ski Wax* в полном вашем распоряжении, гарантируя приятное время препровождение.*

Per la stagione 2009-2010 la gamma di scioline BRIKO-MAPLUS *Ski Wax* si divide in 4 linee di prodotti facilmente comprensibili e studiati per soddisfare le esigenze di ogni sciatore:

RACE WAX

FP4 (COLD-MED-HOT-SUPERMED) Powder-Spray-Solid - Cera perfluorurata da utilizzare in sovrapposizione alle paraffine fluorate in caso di umidità intermedia ed elevata (50%-100%)

HP3 (GREEN-BLUE-VIOLET-RED-YELLOW1/2-ORANGE1/2) Solid-Liquid - Paraffina ad alto contenuto di fluoro per uso agonistico in condizioni di umidità medio-alta (60%-90%) o come base per sovrapporre le cere per fluorate FP4.

LP2 (GREEN-BLUE-VIOLET-RED-YELLOW-ORANGE) Solid-Liquid - Paraffina a basso contenuto di fluoro per allenamento ed uso sportive, e per uso agonistico in condizioni di umidità medio-bassa (30%-60%) o come base per sovrapporre le cere per fluorate FP4.

BP1 (GREEN-BLUE-VIOLET-RED-YELLOW-ORANGE) Solid-Liquid Paraffina alto e medio fondente indicata per la saturazione e la protezione delle solette da gara e per uso agonistico in condizioni di bassa umidità (< 30%). Paraffina per allenamento ed uso sportivo.

SATURATION & PROTECTION PARAFFIN (MED BASE - SOFT BASE)

GRIP WAX

STICK - Sciolina di tenuta per nevi nuove, trasformate e artificiali a cristallo fine o con minima metamorfosi distruttiva.

STICK FLUO - Condizioni di utilizzo come stick ma con elevata umidità dell'aria.

KLISTER - Sciolina di tenuta per nevi trasformate e artificiali a cristallo grosso o con elevata metamorfosi distruttiva.

KLISTER FLUO - Condizioni di utilizzo come klister ma con elevata umidità dell'aria.

UNIVERSAL WAX

Universal solid

Universal solid fluo

Universal granular

Universal liquid

Super glide wax

Skin & Base Glide Wax

Super Grip & Glide Wax - No wax ski

Paraffine universali per laboratori, noleggi ed uso sportivo.

KIT LINE

Prodotti di sciolinatura con accessori per allenamento e uso sportivo.

The range of BRIKO-MAPLUS *Ski Wax* for the 2009-2010 season is split into 4 straightforward lines bound to satisfy every skier's needs:

RACE WAX

FP4 (COLD-MED-HOT-SUPERMED) - Perfluorinated wax to be applied on top of fluorinated paraffin products for racing use in presence of medium-very high humidity (50% - 100%).

HP3 (GREEN-BLUE-VIOLET-RED-YELLOW1/2-ORANGE1/2) Solid-Liquid - High fluoro paraffin for racing use in presence of medium-high humidity (60% - 90%) or as a base before applying perfluorinated waxes FP4.

LP2 (GREEN-BLUE-VIOLET-RED-YELLOW-ORANGE) Solid-Liquid - Low fluoro paraffin for training and leisure, and racing use in presence of low-medium humidity (30% - 60%) or as a base before applying perfluorinated waxes FP4.

BP1 (GREEN-BLUE-VIOLET-RED-YELLOW-ORANGE) Solid-Liquid - High and medium melting point paraffin for saturation and protection of racing ski bases and racing use in presence of low humidity (0% - 30%). Paraffin for training and leisure.

SATURATION & PROTECTION PARAFFIN (MED BASE - SOFT BASE)

GRIP WAX

STICK - Grip ski wax for fresh, altered or artificial snow with fine crystals or minimal destructive metamorphosis.

STICK FLUO - As for Stick, but in presence of high atmospheric humidity.

KLISTER - Grip ski wax for altered or artificial snow with large crystals or high destructive metamorphosis.

KLISTER FLUO - As for Klister, but in presence of high atmospheric humidity.

UNIVERSAL WAX

Universal solid

Universal solid fluo

Universal granular

Universal liquid

Super glide wax

Skin & Base Glide Wax

Super Grip & Glide Wax - No wax ski

Paraffin products for workshop, ski-rental and leisure.

KIT LINE

Waxing products with ski tools for training and leisure.

La gamme de fart Maplus pour la saison 2008-2009 se décompose en 4 catégorie afin de satisfaire les besoins de chaque skieur:

RACE WAX

FP4 (COLD-MED-HOT-SUPERMED) Powder-Spray-Solid - Fart 100% fluor, a appliquer pour la compétition en cas d'humidité très élevée. (50% - 100%).

HP3 (GREEN-BLUE-VIOLET-RED-YELLOW1/2-ORANGE1/2) Solid-Liquid - Paraffine hautement fluorée pour la compétition en cas d'humidité élevée (60% - 90%). Cette paraffine peut servir de base pour les farts 100% fluor de type FP4.

LP2 (GREEN-BLUE-VIOLET-RED-YELLOW-ORANGE) Solid-Liquid - Paraffine faiblement fluorée pour l'entraînement et le loisir, paraffine de compétition dans des cas d'humidité moyen (30%- 60%). Cette paraffine peut servir de base pour les farts 100% fluor de type FP4.

BP1 (GREEN-BLUE-VIOLET-RED-YELLOW-ORANGE) Solid-Liquid - Paraffine d'imprégnation pour ski neufs, pour protéger les skis en stockage ou encore paraffine de base pour fart de compétition ou bien la compétition en cas de faible humidité (0% - 30%). Paraffine pour l'entraînement et le loisir.

SATURATION & PROTECTION PARAFFIN (MED BASE - SOFT BASE)

GRIP WAX

STICK - Fart en poussette pour neige artificiel, fraîche avec des cristaux fins et non métamorphosés.

STICK FLUO - Fart en poussette plus performante en conditions de haute humidité.

KLISTER - Fart de retenu pour neige artificiel transformée, grosse métamorphose des cristaux.

KLISTER FLUO - Fart de retenu plus performant en conditions de haute humidité.

UNIVERSAL WAX

Universal solid

Universal solid fluo

Universal granular

Universal liquid

Super glide wax

Skin & Base Glide Wax

Super Grip & Glide Wax - No wax ski

Paraffine pour les magasins, location et le loisir.

KIT LINE

Gamme des produits de fartage pour l'entraînement et le loisir.

Alle Spraywachse sowie die komplett neue Produktlinie von Pu lverwachsen garantieren auch weiterhin außergewöhnliche Ergebnisse, bei allen Schnee-Bedingungen. Die Kollektion der MAPLUS-Wachse teilt sich in 4 wichtige Produkt-Linien für die Saison 2008-2009 auf und erfüllt damit alle Bedürfnisse der Skisportler:

RACE WAX

FP4 (COLD-MED-HOT-SUPERMED) Powder-Spray-Solid - Perfluorierte Cera-Wachse für den Renn-Gebrauch als Finish-Wachse über alle fluorierten Paraffin-Wachse, bei mittlerer bis hoher Luftfeuchtigkeit (50 %-100%).

HP3 (GREEN-BLUE-VIOLET-RED-YELLOW1/2-ORANGE1/2) Solid-Liquid - High-Fluor-Paraffinwachse für den Renn-Gebrauch bei mittlerer bis hoher Luftfeuchtigkeit (60 %-90%) oder als Base-Wachs unter die perfluorierten Cera-Wachse FP4.

LP2 (GREEN-BLUE-VIOLET-RED-YELLOW-ORANGE) Solid-Liquid - Low-Fluor-Paraffinwachse für den Gebrauch bei niedriger bis mittlerer Luftfeuchtigkeit (30 %-60%) oder als Base-Wachse unter die perfluorierten Cera-Wachse FP4.

BP1 (GREEN-BLUE-VIOLET-RED-YELLOW-ORANGE) Solid-Liquid - Paraffine mit mittleren und hohen Schmelzpunkten für die Sättigung und zum Schutz der Rennbeläge sowie für Rennen bei geringer Luftfeuchtigkeit (0% - 30%). Paraffinwachse für Training und Freizeit.

SATURATION & PROTECTION PARAFFIN (MED BASE - SOFT BASE)

GRIP WAX

STICK - Steigwachse für Neuschnee, Altschnee und Kunstschnee mit feinen Kristallen oder für bereits leicht umgewandelten Schnee.

STICK FLUO - Anwendung wie bei Hartwachs-Sticks, jedoch für hohe Luftfeuchtigkeit.

KLISTER - Steigwachs für Altschnee und Kunstschnee mit groben Kristallen oder stark umgewandelten Schnee.

KLISTER FLUO - Anwendung wie bei Klister, jedoch für hohe Luftfeuchtigkeit.

UNIVERSAL WAX

Universal solid

Universal solid fluo

Universal granular

Universal liquid

Super glide wax

Skin & Base Glide Wax

Super Grip & Glide Wax - No wax ski

Universal-Paraffinwachse für Werkstätten, Verleih und Rennlauf.

KIT LINE

Wachs-Sets mit ski-tools für Training und Freizeit.

Для сезона 2009 - 2010 г. гамма лыжных мазей BRIKO-MAPLUS *Ski Wax* разделится на 4 линей продуктов легких в понимании и предназначенных для удовлетворения потребности каждого лыжника

RACE WAX

FP4 (COLD-MED-HOT-SUPERMED) - Порошок-Спрей-Твёрдая - Цера высокофористая используется для нанесения сверху фтористых парафинов в случае средней и высокой влажности(50% -100%)

HP3 (GREEN-BLUE-VIOLET-RED-YELLOW1/2-ORANGE1/2) - Твёрдый - Жидкий - Парафин с высоким содержанием фтора для использования при соревнованиях в условиях средне-высокой влажности (60%-90%) или как база перед нанесением высокофористой церы FP4.

LP2 (GREEN-BLUE-VIOLET-RED-YELLOW-ORANGE) Твёрдый - Жидкий - Парафин с низким содержанием фтора для тренировок и спортивного использования, а также для использования при соревнованиях при низко-средней влажности (30%-60%) или как база перед нанесением высокофористой церы FP4.

BP1 (GREEN-BLUE-VIOLET-RED-YELLOW-ORANGE) - Твёрдый - Жидкий - Парафин высокой и средней степени мягкости предназначен для насыщения и защиты скользящей поверхности лыж для соревнований в условиях низкой влажности (< 30%). Парафин для тренировок и спортивного использования.

SATURATION & PROTECTION PARAFFIN (MED BASE - SOFT BASE)

GRIP WAX

STICK - Мазь на держание для нового снега, трансформированного и искусственного мелкокристаллического или с минимальными разрушительными изменениями.

STICK FLUO - Условия применения как и stick, но при повышенной влажности воздуха.

KLISTER - Мазь на держание для преобразованного и искусственного крупнокристаллического снега или с повышенными разрушительными изменениями.

KLISTER FLUO - Условия применения как и клистер, но при повышенной влажности воздуха.

UNIVERSAL WAX

Universal solid

Universal solid fluo

Universal granular

Universal liquid

Super glide wax

Skin & Base Glide Wax

Super Grip & Glide Wax - No wax ski

Универсальные парафины для лабораторий, прокатов и спортивного использования.

KIT LINE

Материал для смазки лыж с аксессуарами для тренировок и спортивного использования.

GENERAL FEATURES

INDICAZIONI:

E' consigliabile mettere sempre uno strato di base stick S60 ORANGE a caldo con il ferro sciolinatore. Lo spessore dello strato di base è in funzione dell'abrasività della neve. Maggiore sarà l'abrasività, maggiore sarà lo strato da applicare. La sciolinatura completa richiede come minimo 3 strati di stick sovrapposti anche differenti e di volta in volta tirati con il sughero sintetico.

E' consigliabile mettere sempre uno strato di base klister K82 GREEN a caldo con il ferro sciolinatore. Lo spessore dello strato di base è in funzione dell'abrasività della neve. La sciolinatura completa richiede come minimo 2 strati di klister anche mischiati, e di volta in volta tirati con il pollice. Con neve che tende a ghiacciare è consigliabile usare le stick come indicato in tabella per coprire le klister evitando che ghiaccino compromettendo la tenuta. E' necessario lasciar raffreddare lo sci e dopo l'applicazione dello stick tirarlo in modo leggero e rapido con il sughero sintetico. In caso sciolinatura klister a basse temperature è necessario munirsi di fiamma a gas portatile per riscaldare le scioline e riuscire a miscelarle e tirarle con il pollice o il palmo della mano.

INDICATIONS:

It is suggested to use always a basic layer of stick S60 ORANGE hot by passing the waxing iron. The layer thickness depends on the snow abrasion factor. The complete waxing requests at least 3 layers, even different, spread from time to time with synthetic cork.

It is suggested to use a basic layer of klister K82 GREEN hot by means of the waxing iron. The layer thickness depends on the snow abrasion factor. The complete waxing requests at least 2 layers, even mixed, from time to time with your thumb. When the snow becomes icy, it is suggested to use the stick as indicated in the tabel to cover the klister and so avoiding that it ices loosening the gripping effect. After application of the stick, wait for the ski to cool down, then use the synthetic cork slightly and quickly. In case of klister waxing with low temperature, use a portable gas flame to heat the wax and mix it, then spread it with your thumb or the palm of your hand.

MODE D'EMPLOI:

Il est conseillable de mettre toujours une couche de stick de base S60 ORANGE à chaud, avec le fer de fartage. L'épaisseur de la couche dépend de l'abrasivité de la neige. Le fartage complet requiert au minimum 3 couches

de stick superposées, même différentes, et étirées chaque fois avec le liège synthétique.

Il est conseillable de mettre toujours une couche de klister de base K82 GREEN à chaud, avec le fer de fartage. L'épaisseur de la couche dépend de l'abrasivité de la neige. Le fartage complet requiert au minimum 2 couches de klister superposées, même mélangées, et étirées chaque fois avec le pouce. Avec la neige qui a tendance à glacer, il est conseillable d'utiliser les sticks, comme indiqué sur le tableau, pour couvrir les klisters en évitant qu'ils ne glacent, ce qui diminuerait la prise. Il faut laisser refroidir le ski, et après avoir appliqué le stick passer légèrement et rapidement avec le liège synthétique. En cas de fartage au klister à basse température, il faut se munir d'une flamme à gaz portable, pour chauffer les farts et pour pouvoir les mélanger, et les étirer avec le pouce ou avec la paume de la main.

TIPP:

Die Steigwachs werden auch zum Abdecken der Klister eingesetzt, womit verhindert werden soll, dass letztere aneisen und damit der Abstoß des Ski verloren geht. Es ist notwendig den Ski abkühlen zu lassen, bevor das Steigwachs mit einem Synthetikcork eingearbeitet wird, wobei dieses rasch, aber ohne grossen Druck verrieben wird. Wenn Klister bei kalten Temperaturen gewachst werden, kann es notwendig sein sich einer Gasflamme zu bedienen, um die verfestigten Klister zuerst aufzuwärmen und zu verflüssigen und diese dann mit dem Daumen oder Handballen zu verreiben.

ПРЕДПОСЫЛКА:

Рекомендуется всегда наносить один слой базы stick S60 ORANGE и разогревать утюгом для лыжных масел. Толщина слоя базы зависит от жесткости снега. Чем абразивнее снег, тем толще слой базы. Нанесение лыжной мази в полном комплекте требует как минимум 3 слоя stick, даже разного типа, но каждый раз необходимо растирать синтетической пробкой.

Рекомендуется всегда наносить один слой базы klister K82 GREEN и разогревать утюгом для лыжных масел. Толщина слоя базы зависит от жесткости снега. Нанесение лыжной мази в полном комплекте требует как минимум 2 слоя klister, можно смешивать, но каждый раз необходимо растирать большим пальцем. При снеге, который может заледенеть, рекомендуется использовать stick, как указано в таблице, чтобы покрыть klister и исключить риск недержания лыж. Необходимо оставить лыжи охлаждаться и после нанести stick, растирая синтетической пробкой лёгкими и быстрыми движениями. В случае использования klister при низких температурах, необходимо запастись переносной газовой горелкой для разогрева мази, чтобы удалось нанести её на колодку и размазать большим пальцем или ладонью.

Helmet: Stratos Evo by **BRIKO**
Goggle: Odissey by **BRIKO**

STRATOS EVO - YM GOLD

ART. 013197

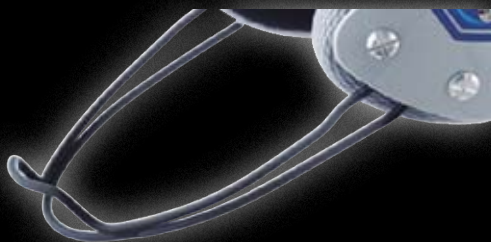

TECHNICAL DETAILS

- Certificated following European, American and Canadian ski helmets standards (EN1077 class A and ASTM S:2040).
- Shell with excellent impact absorption, by Briko High Performance Thermoplastic Resins (BHPTR).
- Active ventilation: vent allow air to flow through integrated channels.
- Removable chinguard available.

SLALOM CHIN GUARD

ART. 013488

- 701 Thrama Metal Silver Double Lens.
- 620 Thrama Red Matic Double Lens.
- 100 Thrama Red Single Lens.

ODISSEY - AA BLACK

ART. 015636-100

THRAMA RED SINGLE LENS

TECHNICAL DETAILS

- Certified Thrama® lens, that reduce the visual noise (diffused light) and intensify the signal in order to optimize the visual information. All lenses also are antifog and available with mirroring treatment.
- Full fit extension: Lateral movement of the strap on the frame, in order to perfectly adapt to every helmet.
- Foam realized in 3 densities for maximum performance and comfort, even in the most extreme condition.
- Strap with silicone.
